Experience

FPX (Contract Management and Workflow - Glider.com)

Software Engineer (June 2014 - Present)

- Expanded upon existing Django application to incorporate new business requirements including placeable signatures in PDF documents and user group assignments for workflow tasks.
- Utilized Twitter Flight and RequireJS to build a scalable and reusable front-end application structure.
- Integrated contract management solution with FPX's other products and Salesforce platform.
- Assisted with identifying business needs and translation to developer requirements.
- Utilized continuous integration tools, including Codeship and Jenkins, alongside automated testing to increase code quality.
- Assisted and advised project managers with making important business decisions related to features, server migrations, and upgrades.

Graphic Systems

Software Developer, Contract (December 2014)

- Added functionality to online ordering system for cancel recent orders and manage contacts for thousands of stores.
- Documented developer processes, introduced version control, set up developer instance of project.

University of Minnesota: Twin Cities

Web Developer and Systems Administrator (March 2012 - July 2014)

- Maintained and improved internal department applications with backend in Django and Python. Applications utilized HTML5 and Javascript/jQuery to enhance the user application and experience. Implemented REST API using Django Rest Framework to decouple front end and back end code.
- Implemented test driven development for all new features and wrote tests for legacy code after documenting the purpose and evaluating functionality.
- Collected and expounded requirements for new and existing features. Self initiated effort to improve undocumented code and increase compliancy with best standard coding practices (PEP8, DRY, TDD).
- Secured web applications by introducing and working with application owners and users to define access controls to specific parts of their applications.
- Reduced redundant user input by implementing and improving backend workflows.
- Advised and worked with faculty to develop professional websites (primarily [Math Insight](#)), improve useability, and encourage software development best practices.
- Rebuilt department event application and integrated with Google Calendar to increase visibility to students and encourage subscriptions.

Rainbow Health Initiative

Volunteer Web Developer (July 2013 - September 2013)

- Worked with Rainbow Health Initiative to create and deploy an online survey to collect data on the LGBT community of Minnesota.
- Provided backend code in Django to collect data and data export solutions.
- Trained RHI webmaster to deploy application.

Skills and Technologies

Programming Languages

- Python
- Javascript
- SQL
- Ruby

Advanced Proficiency

- Django
- jQuery
- Bootstrap
- Git
- HTML, CSS, Jinja2, Less, HAML, Handlebars
- MySQL
- Apache, nginx

Intermediate Proficiency

- Twitter FlightJS
- Selenium
- *nix: Ubuntu, RHEL6, Scientific Linux (SL)
- Flask
- Shibboleth, SSO

Basic Proficiency

- Node.js / Express
- Chef / Puppet
- Continuous Integration Software

Education

Bachelor's of Science in Mathematics

University of Minnesota: Twin Cities (Spring 2013)

- Coursework at the University of Minnesota focused on actuarial mathematics, intermediate economics courses, and cryptography.
- Attended the University of Minnesota: Duluth from Fall 2004 until Spring 2006 with the intent to major in Computer Science.
